

SCHOOL-BASED HEALTH CENTERS

Automation Improving Screening Process to Meet Students Where They Live.

OBJECTIVE

- To simplify and automate the process of accessing patient-generated data.
- To provide a platform that allows students to be more forthcoming with their feelings and issues.
- Offers confidential and private login, completion, and patient-specific resources. HIPAA and FERPA-approved.

BENEFITS

- Efficient - reduces time and labor, scores available in real-time
- Comprehensive - 100s of questionnaires (multilingual), data collection, and quality improvement data reporting
- Easy to Use - automatically assigned surveys, triggered follow-up surveys for some positive results
- Questionnaire categories include:
 - history - intake - demographics
 - general medical - back-to-school visit
 - ADHD
 - Social Determinants of Health (food/housing insecurity, transportation, partner violence, substance use)
 - mental/behavioral health
 - sports physicals - concussion
 - custom

TESTIMONIAL

“CHADIS is convenient. It’s online. We can send parents the link and they complete the ASQ:3 and ASQ:SE. It is protected, that’s very important. It has the ability to resend it and collect that data over time and give tips for developmental activities. It’s super user-friendly.

We love the reports. We gather the data and we include it as one data point for making our decisions.”

LAUREL MATEYKA, PRINCIPAL

P.H. Miller Elementary School, Plano, IL
Customer since 2020

SCREENING WORKFLOW

- Send teen/parent/teacher an invitation link by email or text to complete the questionnaires.
- The patient, parent, or teacher can complete the questionnaires in the comfort of their home at their convenience or at school using a cell phone, tablet, or computer.
- CHADIS automatically scores questionnaires in real time; results are available before the visit.
- Provides data that can inform the necessity for intervention.
- Directly and efficiently facilitates referrals and coordination between CHADIS providers and community organizations.
- CHADIS can provide resources and educational materials.
- Reports and some graphs are available to track student growth and program effectiveness.
