

THE QUESTIONNAIRE & PATIENT ENGAGEMENT SOLUTION + CLINICAL PROCESS SUPPORT

Facilitates Integrated Healthcare

Engaging the patient from pre-visit to post-visit

- automated questionnaire assignments/requests
- pre-visit reminders
- separate confidential teen input & private teen education & resources
- contact free check-in & registration
- access to community resources & individualized patient education based on questionnaire results, provider choice, or patient search
- teacher & other caregiver input by invitation

**"Lets me be a doctor
again."**

Supporting the clinician from pre-visit to post-visit

- pre-visit data allows focus on priorities, collects & scores data in real time with interpretive note
- helps write clinical notes & can keep them private
- facilitates between-visit monitoring with graphic representation over time
- "refer button" option for positive screen to connect with local agency/professional
- CHADIS complements telehealth by providing digital patient data remotely
- ABMS approved-MOC 4
- data for satisfying reports needed for funding

HEALTH EQUITY SUPPORT

CHADIS supports health equity through multilingual assessments, access to services through an easy-to-use referral module, and reports to assist with the interpretation of patient data.
