## Behavioral Health

### Follow-Up Care for Children Prescribed ADHD Medication

CHADIS offers:

- ADHD Developmental Intake Form
- Conners 3 \* (All versions)
- Goals for Change
- Goals Questionnaire
- Medication Questionnaire
- Medication Side Effects (Parent)
- Teacher's Report Form for Ages 6-18 (TRF 6-18)
- Vanderbilt Assessment Scale-Revised & Follow Up
- Weiss ADHD Co-morbid Health Screen (WACS)

CHADIS also offers the ADHD Patient Specific Templates which help busy clinicians address asthma care efficiently and effectively.

The ADHD PST:

- Gathers pre-visit ADHD information from parents AND teachers without any clinician effort and is FERPA compliant.
- Encourages shared decision making with graphics.

- Each PST provides a tailored graphic to be shown to families, illustrating the patient's ADHD challenges over time, facilitating discussion.
- The PST suggests tailored, research-supported goals for clinicians to review with parents. Parents are sent specific suggestions for how to accomplish the chosen goals. Selected goals are also listed in subsequent PSTs, so clinicians are reminded to follow-up on progress.
- Generates 504 Plan and IEP Letters
- Generates individualized patient education/messages and resources
- Eases documentation burden with automated report assistance
- Provides clinician education
